Venereal Diseases  
in the Slovak Republic 2005

Ročník 2006  
ZŠ-1/2006

## Content

Introduction.....	7
Development in reported diseases number of venereal diseases.....	9
Development in number of reported diseases of syphilis and gonococcal infection per 100 000 inhabitants (graph) .....	10
Structure of reported venereal diseases (graph).....	11
Reported diseases of syphilis and gonococcal infection according to permanent address (graph) .....	11
Reported diseases of syphilis and gonococcal infection according to permanent address within years 2000 – 2005.....	12
Reported affections of venereal diseases according to age .....	14
Reported affections of venereal diseases according to diagnoses, sex and type of affection .....	15
Reported affections of venereal diseases according to diagnoses, sex and type of treatment .....	16
Reported affections of venereal diseases according to diagnoses, economic activity and sex .....	17
Reported affections of venereal diseases according to diagnoses, marital status and sex.....	18
Reported affections of venereal diseases according to age groups, sex and diagnoses (only with permanent address in the SR).....	19
Reported affections of venereal diseases according to age groups, sex and type of affection (only with permanent address in the SR).....	20
Reported affections of syphilis and gonococcal infection according to sex and permanent address .....	22
Reported affections of venereal diseases according to permanent address .....	24
Reported affections of venereal diseases according to permanent address per 100 000 inhabitants.....	26
Reported diseases of syphilis according to sex and territory of permanent address.....	28
Reported diseases of gonococcal infection according to sex and territory of permanent address.....	28
Incidence of syphilis diseases according to regions (graph) .....	29
Incidence of gonococcal infection diseases according to regions (graph).....	29
Reported diseases of syphilis according to permanent address per 100 000 inhabitants (map).....	30
Reported diseases of gonococcal infection according to permanent address per 100 000 inhabitants (map).....	30
The Slovak Republic – districts (map) .....	31

## Introduction

*Venereal Diseases is a sectional publication published by Health Statistics Edition. This publication contains an information on sexually transmitted venereal diseases – syphilis, gonococcal infection, chlamydial lymphogranuloma, soft sore, and other STD (dg A56, A59.0, A60.0, A60.1, A63, A64, B16, B20, B25, B37.3, B37.4, B85.3, B86) according to the type. It records the first occurrence in life, recurrence, reinfection, chronicity, sorted by sex, age groups, marital status, economic activity, territorial distribution of patient's residence and territorial occurrence of the venereal disease.*

*Statistical data are processed on the Report on Venereal Diseases Z (MZ SR) 8 – 12. Report on Venereal Diseases is submitted by dermatovenerological departments of health care establishments, which provide health care services to patients with venereal diseases in accordance with the Obligatory Order against Venereal Diseases (Regulation of the MoH SR lined out in the Act, part 51 of the December 29, 1968).*

*This publication contains reported flowcharts on venereal diseases in years 1960 – 2005 in the Slovak Republic and reports syphilis and gonococcal infection in district and county breakdown of the years 2000 – 2005.*

*Tables No. 1, 2, 8, 9, 10, 11.1, 11.2, 12, 13 contain data only on patients with venereal diseases and with permanent residence in the Slovak Republic. Tables No. 3, 4, 5, 6 and 7 contain data on venereal diseases in the Slovak Republic including foreigners.*

*In the year 2005 there were 772 cases of venereal diseases reported including members of military forces, Ministry of Interior and foreigners. That is decrease by 7 cases, i. e. by 0,99 %. In the split 423 men (54,8 %) and 349 women (45,2 %).*

*There were 177 cases of syphilis diagnosed including members of military forces, Ministry of Interior and foreigners. That is decrease by 13,2 % (27 cases) compared with the year 2004. The highest occurrence of syphilis was observed in males with permanent residence in the Slovak Republic in the age group 25 – 34 (30 cases) and in females in the age group 15 – 24 (32 cases).*

*109 cases represented the number of reported cases of gonococcal infection in the Slovak Republic which is a decrease by 14,8 % (19 cases) compared with the year 2004. Gonococcal infection represents 14,1 % of all reported venereal diseases.*

*The occurrence of gonococcal infection was higher in males by 57 cases than in females. The highest occurrence of gonococcal infection was observed in males with permanent residence in the age group 25 – 34 (39 cases) and in females age group 15 – 24 (11 cases).*

*There were 486 cases of the mostly sexually transmitted diseases reported in the year 2005. No case of the chlamydial lymphogranuloma was reported.*
