Úvod

Odbornej verejnosti predkladáme publikáciu Potraty v SR 2010, ktorá vychádza v edícii Zdravotnícka štatistika. Publikácia bola prvýkrát vydaná v roku 1960 v spolupráci s ÚZIS Praha, ktorá až do roku 1992 zahŕňala federálne údaje rozdelené na Českú a Slovenskú republiku.

Podkladom na spracovanie štatistických údajov obsiahnutých v predkladanej publikácii je formulár hlásenia *Žiadosť o umelé prerušenie tehotenstva a hlásenie potratu Z* (MZ SR) 7-12.

Povinnému hláseniu podliehajú všetky druhy potratov – spontánne (v minulosti používaný názov samovoľné), umelé prerušenia tehotenstva (UPT) a ostatné potraty vrátane prípadov ukončenia mimomaternicového tehotenstva vykonané v zdravotníckych zariadeniach (štátnych a neštátnych) v SR. Žiadosti o umelé prerušenie tehotenstva, ktoré neboli realizované, nepodliehajú hláseniu.

Povinnosť hlásiť všetky druhy potratov vyplýva z platných legislatívnych noriem. Zber hlásení a spracovanie za rezort zdravotníctva v rámci štátneho informačného systému (ŠIS) vykonáva Národné centrum zdravotníckych informácií (NCZI, SR), ktoré tiež zabezpečuje v mesačnej periodicite prípravu a kontrolu sledovaných údajov a odovzdanie dátových súborov ŠÚ SR na účely demografickej štatistiky.

Problém sledovania mimomaternicových tehotenstiev sa od roku 1958 rieši takto:

- v rokoch 1958 – 1986 sa mimomaternicové tehotenstvá neevidovali v potratoch,
- v rokoch 1987 – 1989 boli mimomaternicové tehotenstvá zahrnuté do skupiny UPT,
- od roku 1990 – 1996 boli mimomaternicové tehotenstvá zahrnuté len v počte potratov spolu.

Od roku 1997 na základe metodických zmien bola úprava triedenia „Druhu potratu“ na: spontánny, legálne UPT do 8. týždňa, legálne UPT od 9. do 12. týždňa, legálne UPT od 13. do 24. týždňa, mimomaternicové tehotenstvo, iný potrat, v ktorom sú zahrnuté napr. Missed abortion, Mola hydatidosa (Missed abortion, Mola hydatidosa boli zahrnuté v tejto položke už od roku 1994) a nelegálne UPT. Takto sú vypracované prvé 3 tabuľky.

Vo vývojovej tabuľke 1 nie sú započítané mimomaternicové tehotenstvá. Táto tabuľka je vypracovaná pre gynekológov na účely medzinárodného porovnávania.

Publikácia obsahuje vývojové rady vybraných údajov za roky 1960 – 2010 v SR a podľa krajov a okresov za rok 2010.

Väčšia časť tabuliek poskytuje údaje o potratoch podľa územného členenia trvalého bydliska ženy (trvalé bydlisko v SR). Výnimku tvoria tabuľky 10 a 20, v ktorých sú údaje podľa územného členenia zdravotníckeho zariadenia, v ktorom bol potrat vykonaný.

V roku 2010 bolo zaznamenaných 17 219 potratov (vrátane mimomaternicových tehotenstiev), o 716 menej ako v predchádzajúcom roku. V prepočte na 100 narodených detí to predstavuje 28,4 % a na 1 000 žien v reprodukčnom veku (15 – 49 rokov) 12,2 ‰. V roku 2010 bolo vykonaných 9 299 umelých prerušení tehotenstva (UPT), čo predstavuje pokles o 671 oproti roku 2009. Zo zdravotných dôvodov bolo vykonaných 1 125 UPT.

Preface

Hereby we introduce *Abortions in the Slovak Republic 2010* – A publication dedicated for the professional public released in the edition *Health Statistics*. First time it was published in 1960 under cooperation with Institute for Health Information and Statistics in Prague, which covered federal data split to Czech and Slovak Republics up to 1992.

Base for processing statistical data contained in given publication is the template Request for induced interruption of pregnancy and abortion report Z (MZ SR) 7-12.

All sorts of abortions are liable to mandatory reporting – spontaneous (self-acting in the past), legally induced abortions (LIA), and other abortions including cases of terminated ectopic pregnancies performed in health care facilities (state-owned or private) in SR. Requests for legally induced abortions (LIA) which were not accorded are not liable to reporting.

The duty to report all sorts of abortions is resulting from valid legal standards. Collection of reports and processing on behalf of the health service in frame of the State Information System is performed by the National Health Information Centre, which assures on a monthly basis the preparation and checking of monitored data, and handing over the data files to the Statistical Office of SR for the purpose of demographic statistics.

The issue of ectopic pregnancies since 1958 has been solved as follows:

- in period 1958 – 1986 ectopic pregnancies were not reported among abortions,
- in period 1987 – 1989 ectopic pregnancies were included to the group of LIA,
- in period 1990 – 1996 ectopic pregnancies were included to the total abortions.

Since 1997 based on methodical changes the "Sort of abortion" was adjusted as follows: spontaneous, legal LIA up to 8th week, legal LIA from 9th to 12th week, legal LIA from 13th to 24th week, ectopic pregnancy, other abortion, including e.g. missed abortion, hydatidiform mole (missed abortion, hydatidiform mole were included to this item already since 1994), and illegal LIA. All tables starting with 3 are processed in this term.

The evolutional Table 1 does not include ectopic pregnancies. This table is dedicated for the gynecologists for the sake of international comparison.

The publication contains development rows of selected data of the period 1960 – 2010 in SR, and data by counties and districts in 2010.

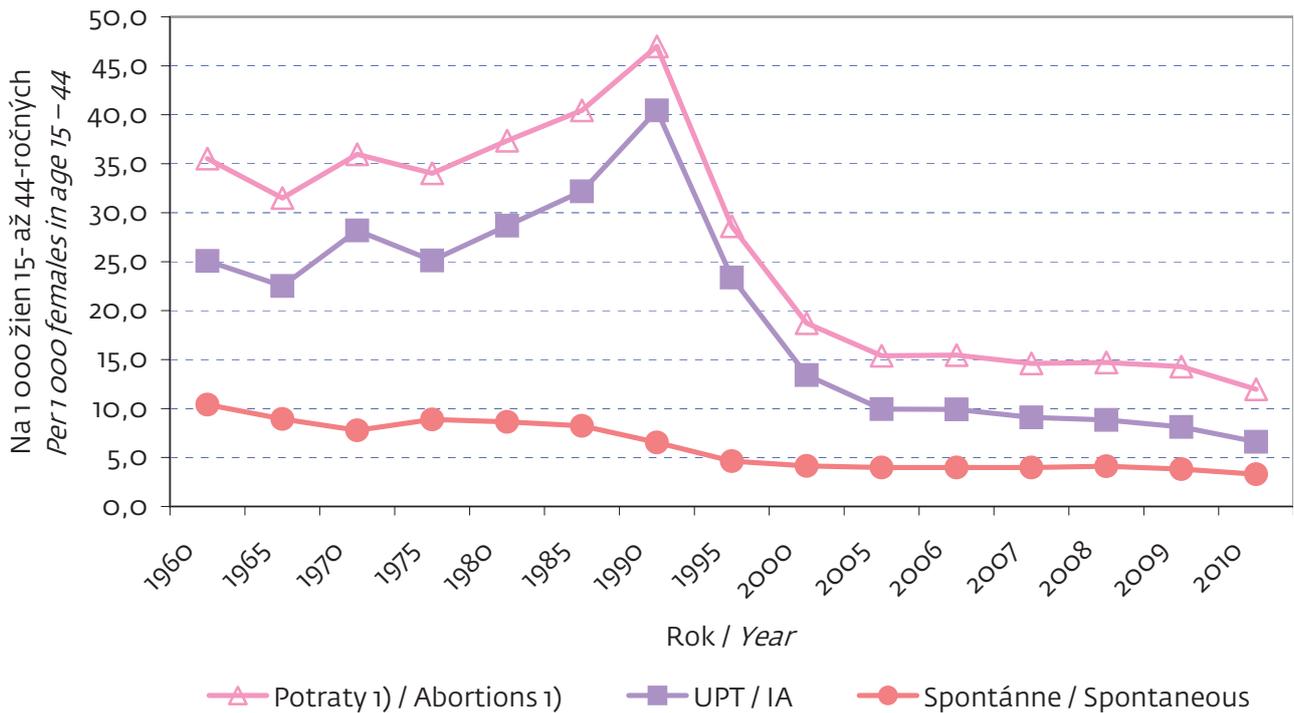

Major part of tables provides data on abortions by territorial split of mother's residence (permanent address in SR) except Tables 10 and 20, where data are sorted by territorial reference of the abortion performing care facility.

17 219 abortions were performed in 2010 (including ectopic pregnancies), which is by 716 less than in the year before. Calculated to 100 live born children it represents 28,4 % and 12,2 ‰ per 1 000 females in reproductive age (15 – 49). 9 299 induced interruptions (LIA) were performed in 2010 which represents a decrease by 671 compared with 2009. 1 125 LIA were performed from medical reasons.

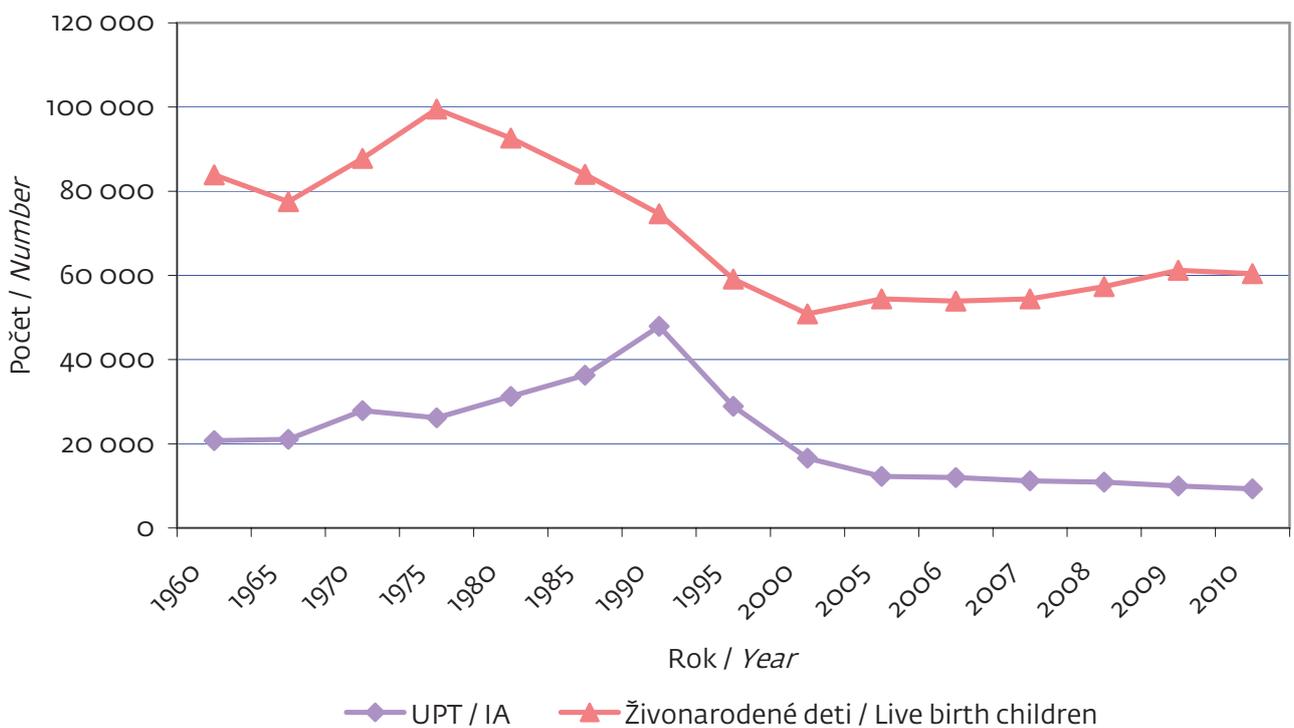

VYSVETLENIE SYMBOLOV

CLARIFICATION OF SYMBOLS

| | | | |
|--------------------------------------|-------------|--|--|
| Ležatá čiarka <i>Macron</i> | (–) | v tabuľke na mieste čísla znamená, že sa jav nevyskytoval | <i>in the place of a number denotes that the phenomenon did not occur</i> |
| Nula <i>Zero</i> | (0,0; 0,00) | znamená viac ako nulu, ale menej ako najmenšiu jednotku vyjadriteľnú v tabuľke | <i>denotes the magnitude more than zero but less than the least unit expressible in the table</i> |
| Bodka <i>Dot</i> | (.) | na mieste čísla znamená, že údaj nie je k dispozícii alebo je nespoľahlivý | <i>in the place of a number denotes that figure is not available or reliable</i> |
| Ležatý krížik <i>Cross italic</i> | (x) | znamená, že zápis nie je možný z logických dôvodov | <i>means that the entry is not possible for logical reasons</i> |
| Znak zlomu <i>Break symbol</i> | (↯) | znamená prerušenie porovnateľnosti časového radu z metodických alebo iných dôvodov | <i>means that the comparability of data series is disconnected due to methodology or another reasons</i> |
