

ERRATA

Report Title:	A 5-Year Prospective Observational Registry to Assess Adverse Events of Interest and Effectiveness in Adults with Active, Autoantibody-Positive Systemic Lupus Erythematosus Treated with or without BENLYSTA™ (belimumab)
----------------------	--

Study Number: 116543

**Report type,
Effective Date of
Report:** Clinical Study Report, Final 02 September 2025

**Effective Date of
Errata:** 29 Oct 2025

©2025. GSK group of companies or its licensor. Trademarks are property of their respective owners.

Rationale

This Errata to the SABLE (116543) Clinical study report (CSR), dated 02 September 2025, is issued to correct errors identified as minor but impactful in the List of Investigators (LOI).

Description of Issue:

After the Final CSR (dated 02 September 2025) had been approved, data collected during site closure activities were reconciled with the information included in the LOI. Discrepancies were noted and corrected.

The overall conclusions of the study are not impacted by these administrative errors in the LOI.

Error(s) and Correction(s):

An updated LOI has been provided below. Updates have been made to clarify the named principal investigator (PI) at time of study closure, together with previous PIs at site, the full list of sub-investigators has been added, and typographical errors in investigator names and contact information have been corrected.

These errors are considered to be minor by GSK and do not require an amendment to the CSR. This Errata provides an official record of the corrected information.

APPENDIX
